

The bar chart displays the frequency of children per family. The x-axis is labeled 'Number of children' and ranges from 0 to 60. The y-axis represents the frequency, with a scale from 0 to 10. The distribution is highly skewed to the right, with a peak at 1 child (frequency of 10). The frequency decreases rapidly as the number of children increases, with most families having 1 or 2 children.
