

The heatmap displays a 10x10 grid of data points. The x-axis ranges from 0 to 60, and the y-axis ranges from 0 to 10. The data is represented by blue bars, where the height of each bar indicates the magnitude of the value at that specific (x, y) coordinate. The highest values are concentrated in the top-left corner (x=0-10, y=8-10) and the bottom-right corner (x=40-50, y=0-2). The values generally decrease as they move away from these high-value regions.
