

The figure displays a 2D density plot with a color gradient from light blue to dark blue. The x-axis is labeled from 0 to 60, and the y-axis is labeled from 0 to 15. The data is concentrated in the lower-left quadrant, forming a complex shape with several peaks. The most intense peak is located at approximately (10, 5). Other notable features include a horizontal band of moderate density around y=10 between x=5 and x=15, and a vertical cluster of points near x=10 extending from y=0 to y=15. The density decreases significantly as x increases beyond 15 and y increases beyond 10.
