

The figure displays a 60x60 grid with 1000 data points. The points are distributed in a pattern that resembles a cross or a plus sign, centered around the coordinates (30, 30). The horizontal bar of the cross extends from x=15 to x=35 at y=30, and the vertical bar extends from y=15 to y=45 at x=30. There are also smaller clusters of points at the corners and along the axes, suggesting a non-uniform distribution.

A horizontal number line with tick marks at 0, 10, 20, 30, and 60.
