

The visualization displays a 60x60 grid with a light gray background. The x-axis is labeled from 0 to 60 in increments of 15, and the y-axis is labeled from 0 to 60 in increments of 15. The data points are represented by blue squares. A prominent horizontal band of blue squares spans from x=0 to x=45 at y=30. Another horizontal band is located at y=15, spanning from x=0 to x=16. A cluster of blue squares is concentrated in the lower-left quadrant, specifically between x=0 and x=15 and y=0 and y=15. There are also several smaller, isolated clusters of blue squares scattered across the grid, including a small 2x2 cluster at the top center (x=25-28, y=55-58) and a small 2x2 cluster at the bottom center (x=15-18, y=5-8).
