

A horizontal bar chart illustrating the distribution of 1000 respondents across 60 age groups. The x-axis represents age groups from 0 to 60, and the y-axis represents the number of respondents. The bars are colored in a gradient from dark blue to light blue. The distribution is skewed to the right, with the highest frequency in the 15-20 age group (approximately 180 respondents) and the lowest frequency in the 0-5 age group (approximately 10 respondents).
