

The chart displays the distribution of the number of children per woman for various birth cohorts. The x-axis represents the number of children (0 to 60), and the y-axis represents the birth cohort (1900 to 1990). The data is presented as horizontal bars, with the length of each bar indicating the number of children per woman for that cohort. The chart shows a clear trend of decreasing fertility over time, with the highest fertility rates in the 1900 cohort and the lowest in the 1990 cohort.

Birth Cohort	Number of Children per Woman (Approximate)
1900	12.5
1910	11.5
1920	10.5
1930	9.5
1940	8.5
1950	7.5
1960	6.5
1970	5.5
1980	4.5
1990	3.5
