

The figure displays a 60x60 heatmap, characteristic of a distance or similarity matrix. The x-axis and y-axis are both labeled from 0 to 60. The color scale ranges from light blue (low values) to dark blue (high values). The matrix is symmetric, with the highest values (darkest blue) concentrated along the main diagonal. The lowest values (lightest blue) are found in the upper-right quadrant, indicating a specific relationship or distance metric. The overall pattern suggests a structured data set where the distance or similarity between elements varies systematically across the matrix.
