

The figure displays a 60x60 grid where each cell represents a bin of size 10x10. The x-axis is labeled from 0 to 60 in increments of 15. The y-axis is unlabeled but also ranges from 0 to 60. The grid is filled with blue squares, representing the distribution of 1000 data points. The distribution is sparse, with a notable concentration of points in the lower-left region (approximately x=0-15, y=0-15) and a few scattered points in the upper-right region (approximately x=30-45, y=40-55).
