

The chart displays the frequency of non-zero elements in the product of two sparse matrices. The x-axis is labeled with values 0, 15, 30, 45, and 60. The y-axis represents the count of occurrences for each value. The distribution is characterized by a high frequency of low values (0-15) and a smaller number of higher values (30-60). The bars are colored in a light blue/purple shade.
