

A horizontal bar chart showing the distribution of 1500 observations across 15 categories. The x-axis represents the count of observations, ranging from 0 to 60. The y-axis represents the categories. The bars are colored in a light blue/purple shade. The distribution is highly skewed, with most categories having counts between 0 and 10, and a few categories having counts between 10 and 30. The categories are ordered by their count, with the highest count category at the top.
