

The figure is a 2D histogram with the x-axis labeled 'Number of clusters' (ranging from 0 to 60) and the y-axis labeled 'Number of nodes' (ranging from 0 to 60). The histogram shows the frequency of clusters with a given number of nodes. The distribution is concentrated in the lower-left region, with a peak around 10-20 nodes and 10-30 clusters. There are several black bars indicating specific data points or thresholds.
