

The heatmap displays a sparse matrix with a grid of gray cells on a white background. The x-axis is labeled from 0 to 60, and the y-axis is labeled from 0 to 60. The matrix shows a pattern of non-zero elements (gray cells) distributed across the grid, with a prominent horizontal band of cells around y=10 and a vertical band of cells around x=10. The cells are arranged in a grid-like pattern, with some cells being darker gray than others, indicating varying magnitudes or values. The overall structure suggests a banded or sparse matrix, possibly representing a discretized differential equation or a similar mathematical model.
