

The heatmap displays a 60x60 grid with a color scale from 0.0 (white) to 0.8 (dark gray). The x-axis is labeled from 0 to 60 in increments of 15, and the y-axis is labeled from 0 to 60 in increments of 15. The visualization shows several distinct clusters of activity:

- A horizontal band of medium gray squares (intensity ~0.4) spanning from x=10 to x=30 at y=10.
- A vertical strip of medium gray squares (intensity ~0.4) at x=55, spanning from y=10 to y=30.
- A small cluster of dark gray squares (intensity ~0.7) at (10, 55).
- A small cluster of medium gray squares (intensity ~0.4) at (55, 10).
- Several smaller clusters of medium gray squares (intensity ~0.4) scattered in the upper half of the grid, including one at (10, 55), one at (55, 10), and one at (10, 55).
