

The heatmap displays a 20x20 matrix with a color scale from light blue (low values) to dark blue (high values). The x-axis is labeled from 0 to 60 in increments of 15, and the y-axis is labeled from 0 to 60 in increments of 15. The matrix shows a pattern of low values (light blue) across most of the area, with a few distinct clusters of higher values (darker blue) in the lower-left quadrant, particularly around the (10, 10) to (20, 20) region. There are also some darker cells scattered in the upper-left quadrant.
