

The figure displays a 60x60 heatmap, characteristic of a distance or similarity matrix. The x and y axes are both labeled from 0 to 60. The color scale ranges from light blue (low values) to dark blue (high values). The matrix is symmetric, with the highest values (darkest blue) concentrated along the main diagonal. The lowest values (lightest blue) are found in the upper-right quadrant, indicating a lack of correlation or a large distance between those elements. The overall pattern suggests a structured relationship, possibly based on spatial coordinates or a hierarchical clustering.

A vertical stack of three squares. The top square is white and labeled '0' to its right. The middle square is light blue and labeled '1' to its right. The bottom square is dark blue and labeled '2' to its right.
